## SERVICES

**Offset Printing:** Used for high-volume orders, our Vcvd 5 colour printing with alcohol dampening technology has made a massive contribution to the simplification and speeding up of the printing and packaging process. Offset Printing consistently produces a high image quality and has a longer printing plate life than on direct litho presses. A further advantage of offset printing is the possibility to adjust the amount of ink on the fountain roller with screw keys resulting in custom solutions.

**Corrugation:** Our latest High-speed and efficient fingerless C and E-Flute corrugating technology will help improve water-resistance and damp-proofing without impairing recyclability.

**Die Punching:** Automatic flat bed die cutting machines offer the ultimate in quality when cutting, creasing or embossing sheeted material. The process is used in a wide variety of sectors from packaging, label, and display manufacture to commercial printing.

**Sheet Laminating:** High speed automatic laminating suitable for preprint sheet to corrugated paper board. This technology makes sheet feeding more smooth and reliable.

**Stitching:** Time and Manpower saving facilities such as, auto- bundling, strapping and box Stapling for unbreakable joints resulting in a much safer process for dispatch and delivery.

**Box Side Gluing:** Automatic corrugated box folder gluer pasting to finish the box making process easily and quickly.

**Other Services:** Adhesive Making, BOPP film lamination, aqueous varnishing, UV Coating and a Laboratory for grammage, burst factor, digital moisture and adhesive testing.
